
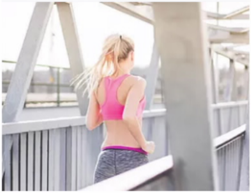
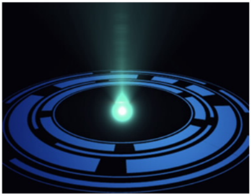
HYDROGEN
HEALTHY LIFE NEW FASHION
WATER BOTTLE A



HEALTH

Fresh hydrogen-rich water cups bring more vitality into the body



SCIENCE

Hydrogen and oxygen separation technology.
intelligent electrolysis.high hydrogen concentration.
more suitable for the human body

TECHNOLOGY

modern minimalist design.stylish and generous.is a glass of art

The secret of hydrogen-rich water

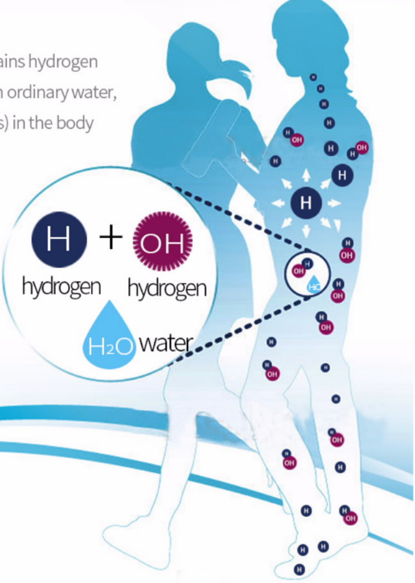
- Easy to absorb
  hydrogen-rich water is a small molecule of water,easy to absorb and infilyrate
- Strong affinity
  hydrogen-rich water belongs to negative potential water,and has a more affinity with the weak alkaline of human body fluids.
- Balance the body
  hydrogen-rich water content is rich in active hydrogen,making it easier to balance.

Amazing hydrogen rich water

In Japan, it is also called the water of water.
It has become popular in Japan for more than ten years.

March 2016 CCTV "Discovery Trip" tracking report

Hydrogen-rich water is a kind of drinking water that contains hydrogen with strong reducing power in water, and is different from ordinary water, and removes excess reactive oxygen species (free radicals) in the body through its antioxidant and reducing power.



1.5L hydrogen water every day

Antioxidant value equivalent to
several hundred fruits and vegetables

756 bananas

516apple

38carrots 3.7pumpkins

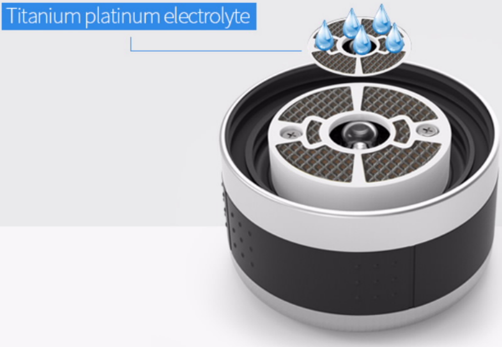
ANTI-AGING

Hydrogen-rich water
Known for the world
The four holy springs
Rich hydrogen cup electrolysis
Hydrogen 1000 ppb or more

- Lourdes Springs
- Nadana Spring Water
- Nordenauer spring water
- Tilakode Springs in Mexico

INTELLIGENT TITANIUM PLATINUM ELECTROLYTE

The water is electrolyzed into water rich in hydrogen atoms, allowing the water to evenly wrap hydrogen molecules promoting hydrogen and Water is stable and has the characteristics of high hydrogen concentration and good stability.



DOT MATRIX LED SCREEN
+
COLORFUL LED INDICATOR

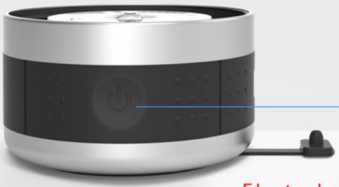
Grasping electrolysis status at all times, the sense of science and technology is full

When electrolysis is carried out, the screen shows the dot dynamic jitter

Colorful LED lights in the cup

MAINTENANCE AND BACKWASHING TECHNOLOGY

After normal electrolysis 5 times, touch the power button, the screen shows "backlash", the colorful LED lights go out, the machine enters the kickback state



Note:

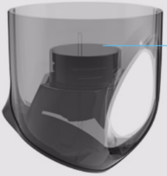
Electrolyzed water cannot be drunk when backwashed

INTIMATE DETAILS
HYDROGEN PRODUCTION

Rotate the cover counterclockwise

Swivel cup cover

Built-in sealed silicone ring, 360° watertight



Food contact PC material

500ml capacity

Inferior product: material is not guaranteed poor quality recycled plastic

DC jack charging port

Waterproof plug design Lightweight plug can be charged Safe, convenient and practical

DC jack charging port

Touch switch for hydrogen production One-touch

operation is more convenient

Sensitive
switch button

small molecules
hydrogen ions
negative potential/ ORP

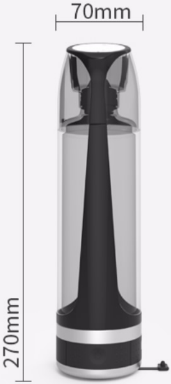
Silicone rubber pad base

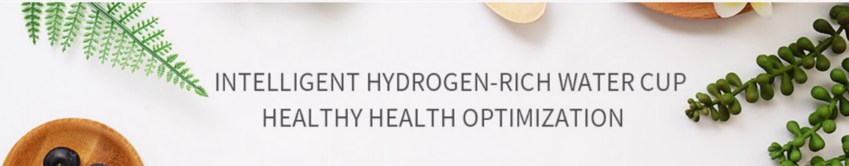
Elegant and silent Non-slip protection desktop

Bottom silicone rubber pad

PRODUCT PARAMETERS

Product Name：Hydrogen water bottle	Product Model：A
Power Supply：DC5V/2A	Maximum power：≤5W
Negative potential：-300-0mV	Product size：70*70*270mn
Capacity：500ml	Material：PC material
Water source temperature：1-40℃	Battery capacity：约1000mAh
Drinking water in line with the "Standard for Drinking Water Hygiene" (GB5749-2006)	





INTELLIGENT HYDROGEN-RICH WATER CUP
HEALTHY HEALTH OPTIMIZATION
